SacEV Members Meeting

This crowded event last week at the Nissan Technical Center drew about 40 attendees. We heard presentations about the CEC roll-out of DC fast charging stations, private electric planes, and EV plans from Sacramento Area Council of Governments (SACOG).

George Washington Carver High School Event

On display at this event were Tesla vehicles (two Model S, a Model X, and a Roadster), a Kia Soul EV, and a Nissan LEAF. SacEV members participated in more than 200 conversations about EVs with students and their parents.

PEV News

SacEV Submits Proposal For EV Help Service

SacEV has requested funds from the RAILS program (Rapid Acceleration, Innovation, and Leadership in Sacramento) to provide an EV Help Service Center. This center would support new EV owners by providing information about using and caring for their vehicles. The center would also provide information to people who are just interested in learning more about EVs.

This is the first time that SacEV has submitted a public grant request. Wish us luck!

If you'd like to offer your experience and insights to EV newbies or to people who are thinking about joining the EV world, contact Thomas Hall at 916-626-2402.

Some Smart EVs Still Available for Sale

Back in a March newsletter, we told you about a San Diego reseller of auction cars who had a number of Smart Electric Drive cars available for sale at an excellent price. See [the March 7th newsletter](#) for more details—the information is in the newsletter's last article.

In the last month, this reseller has sold about 30 of the cars, but 5 low-mileage cars are still available for \$5,900 each. If anyone in the EAA group would like one of these cars, **contact Rick Curtis at 925-413-2990.**

One of these vehicles would make an excellent addition to a family's car fleet for trips to the store, driving kids to activities, and general driving around town. Several SacEV members and their friends have already made purchases.

If you've missed a Newsletter and for more information about the Sacramento Electric Auto Association visit our [website](#).
