2020 Chevrolet Bolt EV Lease Deals

Costco members can currently [lease a 2020 Chevrolet Bolt EV](#) for as little as \$154/month, plus fees. The Costco Auto Program is offering a significant discount for shoppers who lease a Bolt EV from one of the retail chain's affiliated dealerships, but maximum savings appear to be available only in San Francisco, according to [CarsDirect](#).

Members are eligible for a \$3,000 bonus when buying or leasing, according to a Chevy dealer bulletin spotted by [CarsDirect](#). That bonus can be combined with GM's \$5,750 national lease incentive.

Chevy is also offering a \$1,500 bonus for shoppers coming from a 2015 or newer General Motors vehicle (or competitor). This means a 2020 Bolt EV LT can be leased for \$194 a month for 36 months (\$194 due at signing) in most parts of the country, according to [CarsDirect](#). That includes 12,000 miles per year. In San Francisco, Chevy is offering an additional \$1,400 off, which brings the monthly payment down to \$154 (\$154 due at signing). California residents can also get a \$2,000 Clean Vehicle Rebate.

National Drive Electric Week

NDEW Dates: September 26 – October 4, 2020

The 10th annual [National Drive Electric Week](#) is just three weeks away! Due to the COVID-19 pandemic, we are incorporating virtual events for the first time, with dozens of local and national virtual events already registered. In addition, there will be some local in-person events that are held outdoors with social distancing and enhanced safety precautions **required**.

More events are still being added, so continue visiting the [National Drive Electric Week](#) website to find online and in-person events. If you're interested in creating an event, it is not too late!

EV experts and everyday drivers will entertain you with their EV experiences at more than 60 events. Choose your favorite event, one from each topic area, or make it an entire week of learning the latest in EVs. Topics include:

- Choosing an EV
- Sustainable EV tech
- EV basics, charging, and road trips
- How plug-ins shaped our EV future
- EVs for all Incentives: Show me the money

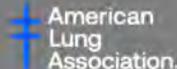

[Subscribe and Drive an Electric Car](#)

One monthly payment, zero hidden fees, no tailpipe emissions. You keep it charged and we take care of everything else. How? Choose your mileage and term, Charge and Drive, and Renew or Walk Away. Charging kit included, with Electrify America charging partnership.

\$449 - \$649 Subscriptions (500 / 1,000 / 1,500 miles/month) include:

All-electric vehicle	Insurance	Repairs & maintenance
Emergency roadside assistance	Contact free home delivery	

Upcoming and Recorded Webinars

Clean Air for All: 50 Years of the Clean Air Act

Date: September 29, 2020

Time: 9:00am - 2:00pm (PDT)

[Register today!](#)

The goals of this half-day symposium are to recognize the accomplishments of the Clean Air Act, document its benefits, and to reaffirm its role as an essential element in protecting the health of Americans. The nation has enjoyed major gains in air quality as a result of the Act, but a great deal of work remains to be done to protect more than 141 million Americans who still live in areas where the air quality puts their health at risk. We must address the new air quality challenges posed by climate change.

Future Residual Value of Batteries

Will your EV's battery have a second life in stationary storage? Maybe. The EV Society of Canada hosted Matt Stevens, Vice President of Electric Vehicles at Geotab, to discuss this very topic. Matt is responsible for Geotab's efforts to help fleets successfully transition to electric mobility and to ensure utilities are prepared for widespread vehicle electrification. Matt holds a Ph.D. from the University of Waterloo, with a focus on electric powertrain design and battery degradation.

Are You Excited to Drive electric?

In a time when the ability to breath clean air is more important than ever, EVs provide a promise of a cleaner transportation future. Whether you're curious about electric vehicles or an experienced EV driver, the 10th annual National Drive Electric Week has something for you.

To kick off this national celebration, we have an exciting Zoom virtual event you won't want to miss.

Date: September 24, 2020

Time: 5:00pm (PDT)

We even have a very special guest for this event. Race car driver and filmmaker Leilani Münter was such a hit for Drive Electric Earth Day that we're having her back.

[RSVP for the chat with Leilani Münter on September 24](#)

Sacramento-area Women of Electric Vehicles

<https://www.womenofevs.com/volunteer-2>

Women Supporting Women. The SWEV Group offers mentoring, and networking opportunities for women in the transportation electrification sector. We are looking for women working in the transportation electrification field who are interested in professional development, networking, mentoring, and support in the largely male-dominated field of electric vehicles.

"Most women doing electric vehicle work look around meeting rooms and at organizational charts and mostly see men," said SacWEVs Chapter Lead Amy Lilly. "While we honor our male colleagues, it's time for these women to have a link to one another that supports their professional growth within the industry. That's where Women of Electric Vehicles comes in."

Climate Friday Town Hall

Date: September 25, 2020

When: 11:00am - 12:00pm

Clean, accessible transportation, we all depend on it! Join [Terea Macomber](#), Electric Vehicle

Director, [Grid Alternatives](#), and [Woody Hastings](#), Energy Program Manager, [The Climate Center](#) for a conversation about the challenges and opportunities in securing equitable, clean transportation policies and infrastructure, with moderator, CEO Ellie Cohen.

Terea and Woody will share their expertise about the fundamental need for reliable transportation—from public transport to personal vehicles and bikes, to ensure a functional society, how transportation policies have often been used to marginalize lower-income communities and communities of color, and how, working together, we can secure accessible, clean transportation for everyone. With transportation the single largest measured source of greenhouse gases in California, a rapid transition to greenhouse gas-free, equitable mobility is a key goal of The Climate Center's [Climate-Safe California](#) campaign. We hope you will join us!

Join the National Electric Auto Association

Join other SacEV members as national Electric Auto Association members, you are joining the national grass-roots community advocating for EVs in the USA. The national EAA is critically important to SacEV as it handles our administrative chores (tax filings, non-profit status, banking service, insurance, legal help, etc.) and provides value, such as webinars and the two nationwide events: National Drive Electric Week and Drive Electric Earth Day.

Your SacEV leadership team relies on these services, so we encourage you to join the national organization for the small sum of \$35 annually. You will also be able to keep current with the latest developments in the rapidly changing world of electric vehicles in our regular Current Events e-blog. This blog is full-color, available 24/7 on-line from your desktop, laptop, smartphone, or however you access the internet.

Your membership provides value to you, our local SacEV chapter, and you become a member of this critical national movement. **Please join [NOW](#).**

More SacEV Events Are Coming Up
